

AA1000 Assurance Standard (2008) Korea Launch

The first corporate accountability standard to be developed using a web-based wiki approach.

AccountAbility, Sd3 and BISD invites you to celebrate the Korea launch of the new AA1000 Assurance Standard. The standard provides the basis for robust and valuable assurance of sustainability reporting. It will help organizations better understand their key sustainability issues and ensure that reporting to stakeholders is more credible. The launch marks the end of an extensive multi-stakeholder process involving consultation in 20 countries and participation from over 4,000 individuals from 90 countries via the online wiki process.
